### **Blue Streak's Canadian customers welcome easier and cost-saving access to product: The Blue Streak Chemical Dispenser Kit now available through Leisure Trailer Sales of Tecumseh, Ontario**

Mason, MI - September 15, 2008 - "We're pleased to announce to our Canadian friends that our popular product is now available through Leisure Trailer Sales in Ontario Canada. "This makes it much easier to purchase the automatic deodorant chemical dispenser and the replacement chemical at a savings because of lower shipping costs and reduced import duty fees", states Blue Streak's president and founder, Carl L. Sumerix about his Michigan Company going international.

The Blue Streak Chemical Dispenser has changed the way chemical deodorant is added to the holding tank. This automatic system meters just the right amount of chemical with each flush while deodorizing the stool each time, doing a much more effective job of odor control while using considerably less chemical than with the old manual application method. The non-formaldehyde chemical, specially formulated to work with the dispenser, has a soft blue color along with a detergent to help clean the stool and holding tank, leaving a pleasant fragrance in the bathroom.

The eco-friendly kit and replacement chemical can now be purchased at:

Leisure Trailer Sales, 204 Patillo Rd., Tecumseh, ON Canada N8N – 2L9
